tarka

solutions that work

Ever since its inception in 2005, Tarka InfoTech Private Limited specializes in wide range of business processes to meet the market demands.

TARKA is managed by a group of seasoned professionals who have been in the software arena for over 25 years associating with major national and multinational organizations and huge process-intensive industries.

Our domain expertise has translated into viable solutions for various clients in different segments :

- ERP
- CRM
- Business Process Management
- Material Management
- Project Management
- Manufacturing
- Human Resource Management
- Document Management
- Asset Management
- Financial Accounting

At TARKA, we are aware that creating any software takes a mixture of technical excellence, domain expertise and clear communication along with the ability to understand the customer requirement.

We know that every client is unique and we strive to deliver an individual, innovative and affordable proposal, followed by an outstanding delivery which is both on time and within budget.

ERP for Small and Tiny Job Workers

Small and Tiny industries who do job work for major manufacturing units constantly face the challenge of providing information on demand pertaining to Planned Dispatches, Production and Stock Status. Lack of such crucial information puts the owner or the top management in a difficult situation in front of the customer.

We have developed a mini ERP called **JobTrack** to access and have the necessary information handy all the time. Using this system, the exact status of the Customer material including Invoices and outstanding payments shall be available in your smart phone at any given time!

JobTrack brings control and visibility into Customer Material Accounting at various stages of job work.
